

Manel Leiva

Staff Product Designer

SUMMARY

Staff Product Designer with 15 years designing complex B2B products.

Designed and shipped a production AI agent for financial data, released to all customers, owning the conversation design and trust patterns directly.

Ran user research on a complex data product, then redesigned its configuration model and syntax so non-technical teams could manage their own data directly.

EXPERIENCE

Senior Product Designer

Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

Designed and shipped an AI agent, a chat panel plus embedded in-app answers where sales reps and managers consult their commission data, sales plans, and team info; released to all customers.

Owned conversation design and trust patterns, working with the founders and engineering on capability scoping and iterating after launch on tone and per-customer terminology.

Sole designer; owned product design and the design system across the full product surface, including a token pipeline from Token Studio to a published npm package with CI validation.

Senior Product Designer

Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

Designed the Dataset Manager, a UI layer over JSON dataset configuration that let finance teams configure their data without engineering support, built on user research that surfaced a mismatch between product terms and user mental models.

Standardised formula syntax across the modeling layer from competitor benchmarking and customer call evidence; made the syntax decisions together with an engineer.

Built the Abax design system alongside product work: two-tier token architecture, adopted across five squads.

Senior UX Designer & Co-founder

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, hybrid

Co-founded and led a UX studio for 11 years; end-to-end product design for clients in media, retail, finance, legal, and culture, including a legal document management system and design plus front-end work for KYMCO.

Built much of what I designed: full WordPress themes wired to the CMS, component libraries in Sketch mapped to front-end code, and by 2020 a shared front-end starter kit with a build pipeline and a CSS variables settings layer.

Taught UX and digital design at postgraduate level, including a course taking a design file to a working CMS-driven site.

SKILLS

Design: Figma, Figma Make, Token Studio, Storybook, Chromatic

Systems: Design tokens, Style Dictionary, component architecture, ESLint adoption rules

Research: Structured user testing, synthesis, Jobs to Be Done

Prototyping: Figma Make (Claude-powered), high-fidelity interaction design

Collaboration: Cross-functional facilitation, engineering alignment, stakeholder presentations

Tools: GitHub, npm, VSCode, Vercel

EDUCATION

Higher National Diploma in Computing Design and Multimedia

ESI (Escuela de Sistemas Informáticos)

2002
