

# Manel Leiva

## Senior Design Systems Designer

### SUMMARY

Senior Product Designer with 15 years designing complex B2B products.

Built two production design systems from scratch, including the token pipeline from Figma to a published npm package.

Shipped a mobile app for iOS and Android, adapted from a responsive web product, working directly with engineering.

Barcelona

### EXPERIENCE

#### Senior Product Designer

##### Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

Built the component library and token pipeline from scratch: Token Studio to Style Dictionary to npm, with CI validation and the W3C token format.

Introduced Figma variables and a structured token architecture; the CTO described the change as going from a 2010 app to a 2020 app.

Adapted the responsive web product for mobile, then shipped it as iOS and Android apps, still live in both stores.

Sole designer; owned product design and design system governance across the full product surface.

#### Senior Product Designer

##### Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

Built the Abax design system alongside product work: two-tier token architecture and a Token Studio to Style Dictionary to npm pipeline, adopted across five squads.

Ran a structured issue-reporting system with a naming-proposals category, and shipped new components under feature flags so squads added their own migration tickets instead of a central team gatekeeping rollout.

First designer on the integrations squad, then the engine squad; co-led the design system business case with the head of design and presented it to engineering leadership.

Designed the Dataset Manager, a UI layer over JSON dataset configuration that let finance teams configure their data without engineering support.

## Senior UX Designer & Co-founder

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, hybrid

Co-founded and led a UX studio for 11 years; end-to-end product design for clients in media, retail, finance, legal, and culture, including a legal document management system and design plus front-end work for KYMCO.

Built much of what I designed: full WordPress themes wired to the CMS, component libraries in Sketch mapped to front-end code, and by 2020 a shared front-end starter kit with a build pipeline and a CSS variables settings layer.

Taught UX and digital design at postgraduate level, including a course taking a design file to a working CMS-driven site.

### SKILLS

**Design:** Figma, Figma Make, Token Studio, Storybook, Chromatic

**Systems:** Design tokens, Style Dictionary, component architecture, ESLint adoption rules

**Research:** Structured user testing, synthesis, Jobs to Be Done

**Collaboration:** Cross-functional facilitation, engineering alignment, stakeholder presentations

**Prototyping:** Figma Make (Claude-powered), high-fidelity interaction design

**Tools:** GitHub, npm, VSCode, Vercel

### EDUCATION

**Higher National Diploma in Computing Design and Multimedia**

ESI (Escuela de Sistemas Informáticos)

2002
