SUMMARY

Senior Product Designer with 15 years designing and shipping complex B2B products.

Recent work includes a shipped AI agent for sales compensation, data-integration and modeling workflows for finance teams, and two production design systems built with front-end engineers.

EXPERIENCE

Senior Product Designer

Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

- Owned product design across Remuner's sales-compensation platform as its sole designer. Scope spanned data integrations and configuration, compensation plans and payouts, rep and manager experiences, approval workflows, and administration.
- Designed and shipped a conversational AI agent for commissions and sales plans; owned conversation design, answer formats, and trust patterns, with capability decisions shared with founders and engineering.
- Built interactive product prototypes through AI-assisted workflows for users to test, separate from the production application.
- Built the component library and owned the token system and its repo; used Codex to add CI validation, drift detection and smoke tests, and opened PRs that replaced hardcoded styles in the front-end app with tokens.

Senior Product Designer

Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

- Designed workflows across Abacum's data-integration and financial-modeling areas, first in the Integrations squad and later Engine. Work spanned integrations, datasets, dimensions and mappings, models, and the modeling language.
- Led design and customer testing for Dataset Manager, translating JSON configuration into guided workflows for finance teams. The squad's engineers estimated that standard configuration took roughly half the previous time.
- Led research and design for a consistent formula language, using customer evidence and competitor benchmarking to shape syntax decisions with Engineering.
- Co-led the Abax design-system business case with the head of design and worked on token architecture, components, governance, and the engineering pipeline across five squads. Abax reached about 47% of component uses at departure, against an 80% goal.

Co-founder & Senior Product Designer

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, on-site, later hybrid

- Co-founded and ran a UX studio for 11 years, designing products for media, retail, finance, legal, and culture clients.
- Owned several client accounts end to end: the brief and client meetings, design direction and explorations, delivery, and the iterations that followed.
- Designed CMS content-upload flows, e-commerce experiences, and back-office interfaces, and built CMS-connected front ends and reusable component libraries.

SKILLS

Product design and research: Complex B2B products, AI agent and conversation design, data-heavy workflows, information architecture, interaction design, customer interviews, structured user testing
AI-assisted workflows and prototyping: Interactive prototypes, Codex, Figma MCP with Claude, Figma Make, Figma, FigJam, HTML, CSS, JavaScript
Design systems: Component architecture, states and variants, Figma libraries and variables, design tokens, documentation, governance
Languages: Catalan and Spanish (native), English (fluent, C1)

EDUCATION

Higher National Diploma in Computing Design and Multimedia

ESI Barcelona
