SUMMARY

Senior Product Designer with 15 years designing and shipping complex B2B products.

Recent work centres on financial software, from data integrations and financial models to compensation payouts, prototyped at high fidelity with AI tools and built in close partnership with engineering.

EXPERIENCE

Senior Product Designer

Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

- Owned product design across Remuner's sales-compensation platform as its sole designer. Scope spanned data integrations and configuration, compensation plans and payouts, rep and manager experiences, approval workflows, and administration.
- Built interactive product prototypes through AI-assisted workflows for users to test, separate from the production application.
- Designed and shipped a conversational AI agent for commissions and sales plans; owned conversation design, answer formats, and trust patterns, with capability decisions shared with founders and engineering.
- Built the component library and owned the token system and its repo, and managed the translation keys built into the components in SimpleLocalize.

Senior Product Designer

Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

- Designed workflows across Abacum's data-integration and financial-modeling areas, first in the Integrations squad and later Engine. Work spanned integrations, datasets, dimensions and mappings, models, and the modeling language.
- Led design and customer testing for Dataset Manager, translating JSON configuration into guided workflows for finance teams. The squad's engineers estimated that standard configuration took roughly half the previous time.
- Proposed moving dimension creation into the open dataset, so users no longer left a configuration halfway to create one elsewhere. Product and Engineering built it, and customers reported faster setup and fewer errors.
- Led research and design for a consistent formula language, using customer evidence and competitor benchmarking to shape syntax decisions with Engineering.
- Co-led the Abax design-system business case with the head of design and worked on token architecture, components, governance, and the engineering pipeline across five squads.

Co-founder & Senior Product Designer

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, on-site, later hybrid

- Co-founded and ran a UX studio for 11 years, designing products for media, retail, finance, legal, and culture clients.
- Owned several client accounts end to end: the brief and client meetings, design direction and explorations, delivery, and the iterations that followed.
- Designed CMS content-upload flows, e-commerce experiences, and back-office interfaces, and built CMS-connected front ends and reusable component libraries.

SKILLS

Product design and research: Complex B2B and financial products, configuration workflows, multi-step flows, information architecture, interaction and visual design, customer interviews, structured user testing
AI-assisted workflows and prototyping: High-fidelity interactive prototypes, Codex, Figma MCP with Claude, Figma Make, Figma, FigJam, HTML, CSS, JavaScript
Design systems: Component architecture, states and variants, Figma libraries and variables, design tokens, localisation keys in components
Languages: Catalan and Spanish (native), English (fluent, C1)

EDUCATION

Higher National Diploma in Computing Design and Multimedia

ESI Barcelona
