SUMMARY

Senior Product Designer with 15 years designing complex B2B products and building and maintaining production design systems.

Built Remuner's design system from scratch and moved Abacum's squads from MUI to the Abax system, with tokens exported from Figma to code as structured data.

Case study: manel-leiva.com/cases/design-systems

EXPERIENCE

Senior Product Designer

Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

- Owned product design across Remuner's sales-compensation platform as its sole designer. Scope spanned data integrations, compensation plans and payouts, rep and manager experiences, and approval workflows.
- Built the component library and design system from scratch, starting with a deliberately small token set, and added ESLint rules that enforced use of system components.
- Owned the design side of the token pipeline; used Codex to add W3C token output, JSON output, CI validation, and drift detection through engineering-reviewed PRs.
- Used the Figma MCP with an AI agent to manage tokens and sync them with code, run accessibility checks, and write component documentation.

Senior Product Designer

Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

- Designed workflows across Abacum's data-integration and financial-modeling areas, first in the Integrations squad and later Engine.
- Co-led the Abax design-system business case with the head of design and presented it to engineering leadership; the work was selected for dedicated design and engineering time.
- Moved squads from MUI to Abax: new components shipped behind feature flags and squads added their own migration tickets. A monthly codebase count put Abax at about 47% of tracked component uses at departure, against an 80% target.
- Created contribution guidelines, naming and deprecation conventions, and issue-reporting categories, and ran the weekly design-library sync where components moved from exploration into the canonical library.
- Worked on Abax's two-tier token architecture and its Token Studio to Style Dictionary pipeline.

Senior Product Designer & Co-founder

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, hybrid

- Co-founded and led a UX studio for 11 years; designed websites and products for media, retail, finance, legal, and culture clients.
- For Kymco, designed and built modular content blocks that let managers add, remove, and edit the content of each bike page, alongside shopping and checkout flows that launched and took real orders.
- Built CMS-connected WordPress themes, reusable component libraries, and a shared starter kit with a build pipeline and CSS variables.

SKILLS

Design systems: Component architecture, states and variants, Figma variables, modes and libraries, token architecture and naming, documentation, contribution and governance, adoption tracking
Web and templates: Responsive layout, page templates, modular content blocks, CMS themes, HTML, CSS, JavaScript
Design to code and AI: Token Studio, Style Dictionary, Storybook, GitHub, ESLint, Codex, Figma MCP with Claude
Languages: Catalan and Spanish (native), English (fluent, C1)

EDUCATION

Higher National Diploma in Computing Design and Multimedia

ESI (Escuela de Sistemas Informáticos)

2002
