

Manel Leiva

Senior Product Designer

SUMMARY

Senior Product Designer with a track record of owning product design end-to-end in fast-moving B2B environments. At Remuner I joined as the first and only designer, built the design discipline from scratch, and shipped across the full product while building the design system in parallel. At Abacum I was the first designer on the integrations squad, taking a back-office tool used only by engineers into a self-serve interface for enterprise finance teams. I work best when the problem is ambiguous and the playbook doesn't exist yet.

EXPERIENCE

Senior Product Designer

Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

Joined as the sole designer with no existing design practice. Built it from scratch: processes, rituals, documentation, and a component library the engineering team could work from on day one.

Owned product design across the full platform. Multi-step approval workflows, role-based permission systems, data mapping flows, and configuration interfaces for complex sales incentive logic. Different user roles with very different levels of technical confidence, from sales reps to finance executives.

Built the design system in parallel with shipping product. Token architecture, component library, and an icons repository engineers could pull without involving design.

Senior Product Designer

Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

First designer on the integrations and datasets squad. Took the dataset manager from a JSON editor used only by the implementation team to a self-serve interface where enterprise finance teams could connect data sources, define transformations, and configure column types on their own.

Designed the modeling layer syntax: a formula expression interface for FP&A model creation. Expert users, financial consequences, no room for error. Standardised formula syntax across the modeling layer and unlocked the follow-on editor suggestions project.

Barcelona

Skills

Design: Fend-to-end product ownership, complex workflow design, configuration interfaces, user research, prototyping, usability testing
Design Systems: Token Studio, Style Dictionary, Storybook, Chromatic, component libraries, token architecture.
Tools: Figma, Miro, JIRA, GitHub
Domain: B2B SaaS, fintech, FP&A, sales incentive management, integrations

Languages

Spanish (native)

Catalan (native)

English (professional)

Contributed to design system standardisation across squads: token architecture, component library structure, and the governance that kept Figma aligned with production through multiple releases.

Senior UX Designer & Co-founder

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, hybrid

Co-founded and ran a UX studio for over a decade. Most complex projects: KYMCO Spain's backoffice, vLex Iceberg (a legal document repository), e-commerce builds. Every project meant learning an unfamiliar domain fast and working close enough to engineering to know what I was asking developers to build.

EDUCATION

Higher National Diploma in Computing Design and Multimedia

ESI (Escuela de Sistemas Informáticos)

2002
