

Manel Leiva

Senior Product Designer

SUMMARY

Senior Product Designer with 15 years designing complex B2B products.

Four years in financial software: FP&A modeling at Abacum and sales compensation at Remuner, turning dense financial data into workflows users run themselves.

Built two production design systems from scratch, including the token pipeline from Figma to a published npm package.

EXPERIENCE

Senior Product Designer

Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

Sole designer; owned product design and the design system across the full product surface.

Designed and shipped an AI agent, a chat panel plus embedded in-app answers where sales reps and managers consult their commission data, sales plans, and team info; released to all customers.

Built the component library and token pipeline from scratch: Token Studio to Style Dictionary to npm, with CI validation and the W3C token format.

Grew the system to 161 component sets and 630 token variables; at departure 10 of 18 core screens ran fully on system components, growing monthly.

Senior Product Designer

Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

Standardised the formula syntax of the FP&A modeling layer from competitor benchmarking and customer call evidence; made the syntax decisions together with an engineer.

Designed the Dataset Manager, a UI layer over JSON dataset configuration that let finance teams configure their data without engineering support.

Built the Abax design system alongside product work: two-tier token architecture and a Token Studio to Style Dictionary to npm pipeline, adopted across five squads.

First designer on the integrations squad, then the engine squad; co-led the design system business case with the head of design.

Senior UX Designer & Co-founder

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, hybrid

Co-founded and led a UX studio for 11 years; end-to-end product design for clients in media, retail, finance, legal, and culture.

Built much of what I designed: component libraries mapped to front-end code, and by 2020 a shared front-end starter kit with a build pipeline and a CSS variables settings layer.

Taught UX and digital design at postgraduate level, including a course taking a design file to a working CMS-driven site.

SKILLS

Design: Figma, Figma Make, Token Studio, Storybook, Chromatic

Systems: Design tokens, Style Dictionary, component architecture, ESLint adoption rules

Research: Structured user testing, synthesis, Jobs to Be Done

Collaboration: Cross-functional facilitation, engineering alignment, stakeholder presentations

Prototyping: Figma Make (Claude-powered), high-fidelity interaction design

Tools: GitHub, npm, VSCode, Vercel

EDUCATION

Higher National Diploma in Computing Design and Multimedia

ESI (Escuela de Sistemas Informáticos)

2002
