SUMMARY

Senior Product Designer with 15 years designing and shipping complex B2B products.

Led research and product design for data-heavy finance and sales-compensation workflows used by professional teams.

Works across product architecture, interaction design, design systems, and engineering delivery, from early validation through launch and iteration.

EXPERIENCE

Senior Product Designer

Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

- Sole designer; owned product design and the design system across the full product surface, working directly with founders and engineers without a product manager.
- Designed and shipped an AI agent where sales reps and managers ask about commission data, sales plans, and team information; owned the conversation design, answer formats, capability boundaries, and trust patterns.
- Ran an ongoing product audit with engineering to define shared patterns, variants, and states and decide when improvements should ship with the roadmap.
- Adapted the responsive web product for mobile, then shipped it as iOS and Android apps, still live in both stores.

Senior Product Designer

Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

- Led design and customer testing for the Dataset Manager, a guided UI over JSON configuration that let finance teams manage their data without engineering support.
- The implementation team's read was that standard dataset configuration took roughly half the previous time; customers could reach a working configuration in their first session.
- Standardised formula syntax across the financial-modeling layer using customer-call evidence and competitor research; made syntax decisions with engineering.

- Built the Abax design system alongside product work: token architecture, component library, governance, and an engineering pipeline adopted across five squads.

Senior Product Designer & Co-founder

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, hybrid

- Co-founded and led a UX studio for 11 years; designed products for media, retail, finance, legal, and culture clients.
- Led end-to-end work across research, information architecture, interaction design, visual design, and delivery.
- Built CMS-connected front ends, reusable component libraries, and a shared starter kit with a build pipeline and CSS variables.

SKILLS

Product design: B2B products, product architecture, complex workflows, interaction design, visual design
Research: Customer interviews, structured user testing, synthesis, qualitative evidence
Systems: Cross-product patterns, component libraries, design tokens, Token Studio, Style Dictionary, Storybook
AI products: Conversation design, capability boundaries, answer formats, trust patterns
Collaboration: Figma, FigJam, GitHub, engineering alignment, business stakeholders, cross-functional facilitation
Prototyping: Figma Make, high-fidelity interaction design, HTML, CSS, JavaScript

EDUCATION

Higher National Diploma in Computing Design and Multimedia

ESI (Escuela de Sistemas Informáticos)

2002
