SUMMARY

Senior Product Designer with 15 years designing digital products and experience in complex B2B financial software.

Led research, testing, and end-to-end product design for data-heavy workflows used by finance and sales-compensation teams. I work across product thinking, interaction and visual design, design systems, and engineering delivery, from early exploration through launch and iteration.

EXPERIENCE

Senior Product Designer

Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

- Sole designer; owned product design and the design system across a B2B sales-compensation platform, working directly with founders and engineers.
- Designed and shipped an AI agent for questions about commissions and sales plans; owned the UX/UI, conversation design, answer formats, capability boundaries, and trust patterns, with capability decisions shared with founders and engineering.
- Researched and redesigned the manager experience, introducing a cross-representative metric overview and simpler navigation. The redesign shipped, with positive feedback on those changes and mixed feedback on the broader experience.
- Ran an ongoing product audit with engineering to define shared patterns, variants, and states and decide when improvements should ship with the roadmap.
- Built and maintained the component library and token system across the product surface.

Senior Product Designer

Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

- Led design and customer testing for the Dataset Manager, translating JSON-based configuration into guided workflows and finance-team language.
- Testing ruled out SQL; worked with Product and Engineering on a language closer to Excel.
- The implementation team's read was that standard dataset configuration took roughly half the previous time; customers could reach a working configuration in their first session.
- Led research and design for a consistent formula language using customer-call evidence and competitor benchmarking; syntax decisions were made with engineering.
- Co-led the Abax design-system business case and worked on tokens, components, governance, documentation, and the engineering pipeline across five squads.

Senior Product Designer & Co-founder

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, hybrid

- Co-founded and led a UX studio for 11 years; designed products for media, retail, finance, legal, and culture clients.
- Led end-to-end work across research, information architecture, interaction design, visual design, prototyping, and delivery.
- Built CMS-connected front ends, reusable component libraries, and a shared starter kit with a build pipeline and CSS variables.

SKILLS

Product design: Complex B2B products, product architecture, user flows, interaction design, visual design
Research and validation: Customer interviews, structured user testing, competitor benchmarking, synthesis, iteration
Systems: Cross-product patterns, component libraries, design tokens, Token Studio, Style Dictionary, Storybook
AI products: Conversation design, capability boundaries, answer formats, trust patterns
Collaboration: Figma, FigJam, GitHub, engineering alignment, business stakeholders, cross-functional facilitation
Prototyping and AI tools: Figma Make, Codex, high-fidelity interaction design, HTML, CSS, JavaScript

EDUCATION

Higher National Diploma in Computing Design and Multimedia

ESI (Escuela de Sistemas Informáticos)

2002
