SUMMARY

Senior Product Designer with 15 years designing and shipping complex B2B products.

Built and maintained two production design systems and shipped a conversational AI product, working directly with engineers from product definition through implementation and iteration.

EXPERIENCE

Senior Product Designer

Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

- Sole designer; owned product design and the design system across a B2B sales-compensation platform, working directly with founders and engineers.
- Built and maintained the Figma component library and token system; later used Codex through engineering-reviewed PRs to add CI validation, drift detection, smoke tests, previews, and implementation outputs.
- Designed and shipped an AI agent for questions about commissions and sales plans; owned conversation design, answer formats, capability boundaries, and trust patterns, with capability decisions shared with founders and engineering.
- Adapted the responsive web product for mobile and shipped it as live iOS and Android webview apps.

Senior Product Designer

Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

- Co-led the Abax design-system business case with the head of design and worked on its Figma variables, token architecture, component library, governance, and engineering pipeline across five squads.
- Ran the weekly library sync and contribution process as squads migrated product surfaces through their own backlogs; separated experimental components from the canonical implementation library.
- Led design and customer testing for the Dataset Manager, a guided interface over JSON configuration that let finance teams manage their data without engineering support.
- Testing showed that users could express transformation logic with familiar Excel functions but not SQL in the product, so the team dropped the SQL direction and extended an Excel-like modeling language with Product and Engineering.

Senior Product Designer & Co-founder

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, hybrid

- Co-founded and led a UX studio for 11 years; designed products for media, retail, finance, legal, and culture clients.
- Led end-to-end work across research, information architecture, interaction design, visual design, prototyping, and delivery.
- Built CMS-connected front ends, reusable component libraries, and a shared starter kit with a build pipeline and CSS variables.

SKILLS

Product design and research: Complex B2B products, product architecture, interaction design, visual design, customer interviews, structured user testing, prototyping
Design systems: Component architecture, states and variants, Figma libraries and variables, design tokens, documentation, governance, migration planning
AI products and AI-assisted workflows: Conversation design, capability boundaries, answer formats, trust patterns, Codex, Figma Make
Delivery: Figma, FigJam, responsive interfaces, HTML, CSS, JavaScript, GitHub, Storybook, engineering alignment, implementation review, stakeholder presentations

EDUCATION

Higher National Diploma in Computing Design and Multimedia

ESI (Escuela de Sistemas Informáticos)

2002
