SUMMARY

Senior Product Designer with 15 years designing and shipping complex B2B products and data-heavy workflows.

Led self-service product work that turned expert-managed configuration into guided experiences for finance teams.

Built two production design systems and worked across product architecture, interaction patterns, research, and engineering delivery.

EXPERIENCE

Senior Product Designer

Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

- Sole designer owning product design and the design system across the full product surface, working directly with founders and engineers without a product manager.
- Ran an ongoing product audit across screens and workflows, defining shared component variants, states, and patterns with engineering and sequencing fixes with the roadmap.
- Designed and shipped an AI agent where sales reps and managers ask about commission data, sales plans, and team information; owned the conversation design, answer formats, capability boundaries, and trust patterns.
- Built the component library and owned the design side of the token pipeline, with engineering-reviewed changes covering CI checks, drift detection, smoke tests, previews, and implementation outputs.

Senior Product Designer

Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

- Led design and customer testing for the Dataset Manager, a guided UI over JSON configuration that let finance teams manage their data without engineering support.
- The implementation team's read was that standard dataset configuration took roughly half the previous time; customers could reach a working configuration in their first session.
- Standardised formula syntax across the financial-modeling layer using customer-call evidence and competitor research; made syntax decisions with engineering.

- Built the Abax design system alongside product work: token architecture, component library, governance, and an engineering pipeline adopted across five squads.

Senior Product Designer & Co-founder

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, hybrid

- Co-founded and led a UX studio for 11 years; designed products for media, retail, finance, legal, and culture clients, including a legal document management system.
- Led end-to-end work across research, information architecture, interaction design, and delivery.
- Built CMS-connected front ends, reusable component libraries, and a shared starter kit with a build pipeline and CSS variables.

SKILLS

Product design: Platform architecture, information architecture, complex workflows, interaction design, visual design
Self-service: Configuration workflows, guided setup, guardrails, professional tools
Research: Customer interviews, structured user testing, synthesis, qualitative evidence
Systems: Component libraries, design tokens, Token Studio, Style Dictionary, Storybook, Chromatic
Collaboration: Figma, FigJam, GitHub, engineering alignment, cross-functional facilitation, stakeholder presentations
Prototyping: Figma Make, high-fidelity interaction design, HTML, CSS, JavaScript

EDUCATION

Higher National Diploma in Computing Design and Multimedia

ESI (Escuela de Sistemas Informáticos)

2002
