SUMMARY

Senior Product Designer with 15 years designing and shipping complex B2B products.
Experience spans financial modeling and sales-compensation workflows, with customer-tested configuration tools, shipped AI experiences, and production design systems.

EXPERIENCE

Senior Product Designer

Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

- Owned product design across Remuner’s sales-compensation platform as its sole designer. Scope spanned data integrations and configuration, compensation plans and payouts, rep and manager experiences, approval workflows, roles and permissions, and administration.
- Designed and shipped a conversational AI agent for commissions and sales plans; owned conversation design, answer formats, and trust patterns, with capability decisions shared with founders and engineering.
- Captured and analysed user feedback after the manager-view redesign shipped, separating task-blocking problems from other friction to guide future iterations.
- Built interactive product prototypes through AI-assisted workflows for users to test, separate from the production application.
- Built and maintained the component library and token system; used Codex to add CI validation, drift detection, smoke tests, previews, and implementation outputs through engineering-reviewed PRs.

Senior Product Designer

Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

- Designed workflows across Abacum’s data-integration and financial-modeling areas, first in the Integrations squad and later Engine. Work spanned integrations, datasets, dimensions and mappings, models, and the modeling language.
- Led design and customer testing for Dataset Manager, translating JSON configuration into guided workflows for finance teams. The implementation team's read was that standard configuration took roughly half the previous time.
- Proposed creating and editing dimensions within the open dataset to remove a disruptive context switch. The change shipped with Product and Engineering; customers reported faster configuration, fewer errors, and less confusion.
- Led research and design for a consistent formula language, using customer evidence and competitor benchmarking to shape syntax decisions with Engineering.
- Co-led the Abax design-system business case with the head of design and worked on token architecture, components, governance, and the engineering pipeline across five squads.

Senior Product Designer & Co-founder

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, hybrid

- Co-founded and led a UX studio for 11 years; designed products for media, retail, finance, legal, and culture clients.
- Designed CMS content-upload flows, e-commerce experiences, and back-office interfaces. Led work from research and information architecture through interaction design, prototyping, and delivery.
- Owned design and frontend implementation for Kymco e-commerce experiences, including shopping and checkout flows that launched and took real orders.

SKILLS

Product design and research: Complex B2B financial workflows, product architecture, multi-step flows, interaction and visual design, customer interviews, structured user testing, feedback synthesis

Design systems: Component architecture, states and variants, Figma libraries and variables, design tokens, documentation, governance, migration planning

AI-assisted workflows and prototyping: Codex, Figma Make, Figma, FigJam, HTML, CSS, JavaScript

Collaboration and delivery: Early Product and Engineering collaboration, implementation review, GitHub, design critique, distributed teams

EDUCATION

Higher National Diploma in Computing Design and Multimedia

ESI (Escuela de Sistemas Informáticos)

2002
