SUMMARY

Senior Product Designer with 15 years designing complex B2B products.

Built two production design systems from scratch in financial software and sales compensation SaaS.

Works directly with engineers on component architecture, design tokens, governance, and the pipelines connecting Figma to code.

EXPERIENCE

Senior Product Designer

Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

- Built the component library and design system from scratch as sole designer, alongside product work across the full product surface.
- Owned the design side of the token pipeline; used Codex to add CI validation, drift detection, smoke tests, W3C token output, an HTML preview, and JSON output through engineering-reviewed PRs.
- Ran an ongoing product audit: captured UI patterns, defined variants and states, then decided with engineers whether to fix them immediately or within upcoming product work.
- Adapted the responsive web product for mobile and shipped it as live iOS and Android webview apps.

Senior Product Designer

Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

- Built the Abax design system alongside product work: two-tier token architecture, component library, governance, and a Token Studio to Style Dictionary engineering pipeline adopted across five squads.
- Co-led the design-system business case with the head of design and presented it to engineering leadership; the work was selected for dedicated design and engineering time.
- Ran the weekly design-library sync and a structured contribution process; components moved from exploration to a canonical implementation library only after review.

- Set adoption targets up front and used feature flags and squad-owned migration backlogs to move existing product surfaces onto the system incrementally.

Senior Product Designer & Co-founder

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, hybrid

- Co-founded and led a UX studio for 11 years; designed products for media, retail, finance, legal, and culture clients.
- Built much of what I designed, including CMS-connected WordPress themes, front-end component libraries, and a shared starter kit with a build pipeline and CSS variables.
- Taught UX and digital design at postgraduate level, including taking a design file through to a working CMS-driven site.

SKILLS

Design systems: Component architecture, design tokens, Figma libraries, governance, contribution models, migration planning
Tools: Figma, Token Studio, Style Dictionary, Storybook, Chromatic, GitHub, ESLint
Front-end alignment: MUI, Vuetify, Sass, HTML, CSS, JavaScript
Product design: Product architecture, complex workflows, interaction design, visual design
Research: Customer interviews, structured user testing, synthesis, Jobs to Be Done
Collaboration: Engineering alignment, cross-functional facilitation, stakeholder presentations

EDUCATION

Higher National Diploma in Computing Design and Multimedia

ESI (Escuela de Sistemas Informáticos)

2002
