SUMMARY

Senior Product Designer with 15 years of experience designing complex B2B products, with a focus on data-heavy workflows, product systems and end-to-end delivery.

Designed and shipped a production AI agent, built two design systems from scratch, and previously co-founded and ran a product design studio for 11 years. Comfortable working from ambiguous problems through product definition, prototyping and implementation.

EXPERIENCE

Senior Product Designer

Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

- Designed and shipped an AI agent that answers questions about pay using commission calculations and plan rules, defining what it could answer, how answers were presented, and when it should refuse.
- Owned the agent's conversation design, including capability scoping, response formats, tone, and trust and accuracy patterns, working directly with Product and Engineering.
- Took ownership of product design and the design system as the sole designer, from problem definition through implementation.
- Built the product's component library and token pipeline from scratch, connecting Token Studio, Style Dictionary and npm with CI validation and the W3C Design Token format.
- Worked closely with engineering to turn design-system decisions into reusable, production-ready components and shared implementation standards.

Senior Product Designer

Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

- First designer on the integrations squad and later the engine squad, working on complex data workflows for finance teams.
- Designed Dataset Manager, replacing a JSON-based interface with a structured data-management layer that let finance teams manage their data without engineering support.
- Defined the formula language for Abacum's modelling layer with Engineering, creating the foundation for subsequent in-editor suggestions.

- Co-led the business case for Abacum's design system with the Head of Design and presented it to engineering leadership, aligning design-system investment with product and engineering needs.
- Built and scaled the Abax design system across five product squads, including token architecture, component library, ESLint enforcement and governance.

Senior Product Designer & Co-founder

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, hybrid

- Co-founded and led a UX/product studio for 11 years, designing digital products for clients across media, retail, finance, legal and culture.
- Led end-to-end product design across projects including a legal document management system and digital products for KYMCO.
- Worked across design and front-end implementation, building WordPress themes, CMS-driven interfaces and component libraries mapped to production code.
- Developed a shared front-end starter kit with a build pipeline and CSS variables layer, extending system thinking from design into implementation.
- Taught UX and digital design at postgraduate level, including a course focused on taking a design file through to a working CMS-driven product.

SKILLS

Product Design: Complex workflows, information architecture, interaction design, product discovery, prototyping, user testing
Design Systems: Design tokens, component architecture, contribution standards, Style Dictionary, Token Studio, Storybook, Chromatic
AI: AI-assisted workflows, conversational interfaces, AI interaction design
Collaboration: Product & Engineering partnership, cross-functional facilitation, stakeholder alignment, design critique
Research: Structured user testing, qualitative synthesis, Jobs To Be Done, customer interviews
Technical: Figma, GitHub, npm, VS Code, Vercel, HTML/CSS, front-end collaboration

EDUCATION

Higher National Diploma in Computing Design and Multimedia

ESI (Escuela de Sistemas Informáticos)

2002
