SUMMARY

Senior Product Designer with 15 years designing and shipping complex B2B products.
Designed a shipped conversational AI agent, built interactive prototypes through AI-assisted workflows, and developed production design systems with engineering teams.

EXPERIENCE

Senior Product Designer

Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

- Owned product design across Remuner's sales-compensation platform as its sole designer. Scope spanned data integrations and configuration, compensation plans and payouts, rep and manager experiences, approval workflows, and administration.
- Designed and shipped a conversational AI agent for commissions and sales plans; owned conversation design, answer formats, and trust patterns, with capability decisions shared with founders and engineering.
- Built interactive product prototypes through AI-assisted workflows for users to test, separate from the production application.
- Investigated unclear commission information through user interviews and designed dashboard changes that shipped; user testing showed users understood the plan calculations and payout timing they had previously been missing.
- Built and maintained the component library and token system; used Codex to add CI validation, drift detection, smoke tests, previews, and implementation outputs through engineering-reviewed PRs.

Senior Product Designer

Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

- Designed workflows across Abacum's data-integration and financial-modeling areas, first in the Integrations squad and later Engine. Work spanned integrations, datasets, dimensions and mappings, models, and the modeling language.
- Led research, design, and customer testing for Dataset Manager, proposing guided transformation steps and a formula approach familiar from Excel in place of technical configuration.
- Led research and design for a consistent formula language, using customer evidence and competitor benchmarking to shape syntax decisions with Engineering.
- Co-led the Abax design-system business case with the head of design and worked on token architecture, components, governance, and the engineering pipeline across five squads.
- Introduced agendas and rotating hosts for design-team meetings, plus a weekly design-system meeting held when there was progress to review.

Senior Product Designer & Co-founder

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, hybrid

- Co-founded and led a UX studio for 11 years; designed products for media, retail, finance, legal, and culture clients.
- Designed CMS content workflows, e-commerce experiences, and back-office interfaces. For Kymco, owned the design process and frontend implementation of shopping and checkout flows that launched and took real orders.
- Built CMS-connected front ends, reusable component libraries, and a shared starter kit with a build pipeline and CSS variables.

SKILLS

Product design and research: Complex B2B products, product architecture, multi-step flows, interaction design, visual design, customer interviews, structured user testing
Design systems: Component architecture, states and variants, Figma libraries and variables, design tokens, documentation, governance, migration planning
AI-assisted workflows and prototyping: Codex, Figma Make, Figma, FigJam, HTML, CSS, JavaScript
Collaboration and delivery: Designer mentoring, teaching UX and components, GitHub, engineering alignment, implementation review, design critique, distributed teams

EDUCATION

Higher National Diploma in Computing Design and Multimedia

ESI (Escuela de Sistemas Informáticos)

2002
