SUMMARY

Senior Product Designer with 15 years of experience designing complex B2B products, specialising in data-heavy workflows, information architecture, product systems and cross-functional delivery.

Experienced in taking ambiguous problems from discovery through design and implementation. Designed and shipped a production AI agent for working with commission and sales data, and built two design systems from scratch. Strong partner to Product and Engineering, including experience as a sole designer.

EXPERIENCE

Senior Product Designer

Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

- Designed and shipped a production AI agent combining conversational interfaces with contextual in-app answers for sales reps and managers working with commission data, sales plans and team information.
- Owned conversation design, including capability scoping, response formats, tone, and trust and accuracy patterns, working directly with Product and Engineering.
- Owned product design and the design system as the sole designer, from problem definition through implementation.
- Built the component library and token pipeline from scratch using Token Studio, Style Dictionary and npm, with CI validation and W3C Design Token format.
- Partnered with Engineering to turn design decisions into reusable, production-ready components and shared implementation standards.

Senior Product Designer

Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

- First designer on the integrations squad and later the engine squad, working on complex data workflows for finance teams.
- Designed Dataset Manager, a UI layer over JSON dataset configuration that enabled finance teams to manage their data without engineering support.
- Standardised formula syntax across the modelling layer using competitor benchmarking and customer-call evidence, making core syntax decisions with Engineering.

- Used customer feedback and qualitative research to inform product decisions across complex financial workflows.
- Co-led the business case for Abacum's design system with the Head of Design, presenting it to Engineering leadership and aligning investment with product and engineering needs.
- Built the Abax design system, including a two-tier token architecture and Token Studio → Style Dictionary → npm pipeline adopted across five squads.

Senior Product Designer & Co-founder

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, hybrid

- Co-founded and led a UX/product studio for 11 years, designing digital products across media, retail, finance, legal and culture.
- Led end-to-end product design for projects including a legal document management system and digital products for KYMCO.
- Designed information architectures, CMS-driven interfaces and component libraries mapped to production code.
- Developed a shared front-end starter kit with a build pipeline and CSS variables layer.
- Taught UX and digital design at postgraduate level.

SKILLS

Product Design: Complex workflows, information architecture, interaction design, product discovery, prototyping, usability testing
Research: Customer interviews, qualitative synthesis, structured user testing, Jobs To Be Done, competitor benchmarking
AI: AI interaction design, conversational interfaces, AI-assisted workflows, trust and accuracy patterns
Design Systems: Design tokens, component architecture, contribution standards, Token Studio, Style Dictionary, Storybook, Chromatic
Collaboration: Product & Engineering partnership, stakeholder alignment, cross-functional facilitation, design critique
Technical: Figma, GitHub, npm, VS Code, Vercel, HTML/CSS, front-end collaboration

EDUCATION

Higher National Diploma in Computing Design and Multimedia

ESI (Escuela de Sistemas Informáticos)

2002
