Manel Leiva

Senior Product Designer, Design Systems

maneleiva@gmail.com | +34 622 144 909 | manel-leiva.com | linkedin.com/in/maneleiva

SUMMARY

Senior Product Designer with 15 years designing and shipping complex B2B products.

Built and maintained Remuner's design system from scratch, including the token repo and its CI, and worked on Abacum's Abax system across five squads.

EXPERIENCE

Senior Product Designer

Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

- Owned product design across Remuner’s sales-compensation platform as its sole designer, including its design system. Scope spanned data integrations and configuration, compensation plans and payouts, rep and manager experiences, approval workflows, and administration.
- Built the component library and owned the token system and its repo; used Codex to add CI validation, drift detection and smoke tests, and opened PRs that replaced hardcoded styles in the front-end app with tokens.
- Used the Figma MCP with Claude to keep tokens in sync between code and Figma, check design-code parity, and generate a Storybook view and documentation for each component.
- Brought in-use colours to WCAG AA contrast and designed focus and error states that do not rely on a coloured border alone.
- Designed and shipped a conversational AI agent for commissions and sales plans; owned conversation design, answer formats, and trust patterns, with capability decisions shared with founders and engineering.

Senior Product Designer

Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

- Designed workflows across Abacum’s data-integration and financial-modeling areas, first in the Integrations squad and later Engine. Work spanned integrations, datasets, dimensions and mappings, models, and the modeling language.
- Co-led the Abax design-system business case with the head of design and worked on token architecture, components, governance, and the engineering pipeline across five squads. Abax reached about 47% of component uses at departure, against an 80% goal.
- Led design and customer testing for Dataset Manager, translating JSON configuration into guided workflows for finance teams. The implementation team's read was that standard configuration took roughly half the previous time.

Co-founder & Senior Product Designer

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, hybrid

- Co-founded and ran a UX studio for 11 years, designing products for media, retail, finance, legal, and culture clients.
- Built reusable component libraries and a shared starter kit with a build pipeline and CSS variables, and helped vLex, a client, build its design system and coached its designers on using it.
- Designed CMS content-upload flows, e-commerce experiences, and back-office interfaces, and built and deployed CMS-connected front ends in HTML, CSS and JavaScript.

SKILLS

Design systems: Component architecture, states and variants, Figma libraries and variables, design tokens, Storybook, documentation, governance, adoption, migration planning
Design and code: Token CI and drift detection, design-code parity, GitHub PRs, HTML, CSS, JavaScript
AI-assisted workflows: Figma MCP with Claude, Codex, Figma Make
Product design and research: Complex B2B products, information architecture, interaction design, customer interviews, structured user testing
Languages: Catalan and Spanish (native), English (fluent, C1)

EDUCATION

Higher National Diploma in Computing Design and Multimedia

ESI (Escuela de Sistemas Informáticos)
