SUMMARY

Senior Product Designer with 15 years designing and shipping complex B2B products.

Recent work covers data-heavy analytical workflows, from dataset setup to sales-performance dashboards, and a shipped AI agent that answers questions about commissions and plans.

EXPERIENCE

Senior Product Designer

Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

- Owned product design across Remuner's sales-compensation platform as its sole designer. Scope spanned data integrations and configuration, compensation plans and payouts, rep and manager experiences, approval workflows, and administration.
- Designed and shipped a conversational AI agent for commissions and sales plans; owned conversation design, answer formats, and trust patterns, with capability decisions shared with founders and engineering.
- Interviewed reps who called their dashboard unintuitive and redesigned it around plan calculations and payout timing. After release, analytics showed fewer clicks to reach a metric.
- Built interactive prototypes with AI-assisted workflows for user testing.
- Built the component library and owned the token repo; used Codex to add CI validation and drift detection, and opened PRs replacing hardcoded styles with tokens.

Senior Product Designer

Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

- Designed workflows across Abacum's data-integration and financial-modeling areas, first in the Integrations squad and later Engine. Work spanned integrations, datasets, dimensions and mappings, models, and the modeling language.
- Led design and customer testing for Dataset Manager, translating JSON configuration into guided workflows for finance teams. The implementation team's read was that standard configuration took roughly half the previous time.
- Proposed moving dimension creation into the open dataset, so users no longer left a configuration halfway to create one elsewhere. Product and Engineering built it, and customers reported faster setup and fewer errors.
- Co-led the Abax design-system business case with the head of design and worked on token architecture, components, governance, and the engineering pipeline across five squads. Abax reached about 47% of component uses at departure, against an 80% goal.

Co-founder & Senior Product Designer

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, hybrid

- Co-founded and ran a UX studio for 11 years, designing products for media, retail, finance, legal, and culture clients.
- Owned several client accounts end to end: the brief and client meetings, design direction and explorations, delivery, and the iterations that followed.
- Designed CMS content-upload flows, e-commerce experiences, and back-office interfaces, and built CMS-connected front ends, reusable component libraries, and a shared starter kit with a build pipeline and CSS variables.

SKILLS

Product design and research: Complex B2B products, data-heavy interfaces and dashboards, information architecture, multi-step flows, conversation design for AI agents, customer interviews, structured user testing
Design systems: Component architecture, states and variants, Figma libraries and variables, design tokens, documentation, governance
AI-assisted workflows and prototyping: Codex, Figma MCP with Claude, Figma Make, Figma, FigJam, HTML, CSS, JavaScript
Languages: Catalan and Spanish (native), English (fluent, C1)

EDUCATION

Higher National Diploma in Computing Design and Multimedia

ESI (Escuela de Sistemas Informáticos)
