SUMMARY

Senior Product Designer with 15 years designing and shipping complex B2B products.
Recent work centres on configuration-heavy software, from data integrations and dataset setup to roles and permissions, designed in close partnership with engineering.

EXPERIENCE

Senior Product Designer

Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

- Owned product design across Remuner’s sales-compensation platform as its sole designer. Scope spanned data integrations and configuration, compensation plans and payouts, rep and manager experiences, approval workflows, and administration.
- Designed for the admin side of a multi-module platform, where customers activated modules and set roles, permissions and access levels.
- Built the component library and owned the token system and its repo; used Codex to add CI validation, drift detection and smoke tests, and opened PRs that replaced hardcoded styles in the front-end app with tokens.
- Designed and shipped a conversational AI agent for commissions and sales plans; owned conversation design, answer formats, and trust patterns, with capability decisions shared with founders and engineering.

Senior Product Designer

Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

- Designed workflows across Abacum’s data-integration and financial-modeling areas, first in the Integrations squad and later Engine. Work spanned integrations, datasets, dimensions and mappings, models, and the modeling language.
- Led design and customer testing for Dataset Manager, translating JSON configuration into guided workflows for finance teams. The implementation team's read was that standard configuration took roughly half the previous time.
- Proposed moving dimension creation into the open dataset, so users no longer left a configuration halfway to create one elsewhere. Product and Engineering built it, and customers reported faster setup and fewer errors.
- Co-led the Abax design-system business case with the head of design and worked on token architecture, components, governance, and the engineering pipeline across five squads.

Senior Product Designer & Co-founder

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, hybrid

- Co-founded and led a UX studio for 11 years; designed products for media, retail, finance, legal, and culture clients.
- Designed CMS content-upload flows, e-commerce experiences, and back-office interfaces. Led work from research and information architecture through interaction design, prototyping, and delivery.
- Built CMS-connected front ends, reusable component libraries, and a shared starter kit with a build pipeline and CSS variables.

SKILLS

Product design and research: Complex B2B products, configuration and admin workflows, roles and permissions, information architecture, interaction models, multi-step flows, customer interviews, structured user testing
Design systems: Component architecture, states and variants, Figma libraries and variables, design tokens, documentation, governance
Prototyping and tools: Figma (complex flows, components, variants, interactive prototypes), FigJam, Figma Make, Figma MCP with Claude, Codex, HTML, CSS, JavaScript
Languages: Catalan and Spanish (native), English (fluent, C1)

EDUCATION

Higher National Diploma in Computing Design and Multimedia

ESI (Escuela de Sistemas Informáticos)

2002
