SUMMARY

Senior Product Designer with 15 years designing and shipping complex B2B products.

Takes AI and B2B features from customer research to release, including Remuner's conversational AI agent and a design system built from scratch.

Case study: manel-leiva.com/cases/ai-agent

EXPERIENCE

Senior Product Designer

Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

- Owned product design across Remuner's sales-compensation platform as its sole designer. Scope spanned data integrations and configuration, compensation plans and payouts, rep and manager experiences, approval workflows, and administration.
- Designed and shipped a conversational AI agent for commissions and sales plans. Owned conversation design, answer formats, off-scope refusals, and role-based access for managers and reps, with capability decisions shared with founders and engineering.
- Built interactive product prototypes through AI-assisted workflows for users to test, separate from the production application.
- Investigated unclear commission information through user interviews and designed dashboard changes that shipped; user testing showed users understood the plan calculations and payout timing they had previously been missing.
- Built the component library and token system from scratch; used Codex to add CI validation, drift detection, smoke tests, and token outputs through engineering-reviewed PRs.

Senior Product Designer

Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

- Designed workflows across Abacum's data-integration and financial-modeling areas, first in the Integrations squad and later Engine. Work spanned integrations, datasets, dimensions and mappings, models, and the modeling language.
- Led design and customer testing for Dataset Manager, turning JSON configuration into guided workflows for finance teams. The implementation team's read was that standard configuration took roughly half the previous time.
- Led research and design for a consistent formula language, using customer evidence and competitor benchmarking to shape syntax decisions with Engineering.
- Co-led the Abax design-system business case with the head of design, and ran the weekly library sync and contribution process across five squads.

Senior Product Designer & Co-founder

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, hybrid

- Co-founded and led a UX studio for 11 years; designed products for media, retail, finance, legal, and culture clients.
- Built CMS-connected front ends, reusable component libraries, and a shared starter kit with a build pipeline and CSS variables.
- Mentored junior practitioners and taught UX, components, and digital design.

SKILLS

AI products and AI-assisted workflows: Conversation design, answer formats, capability boundaries, trust patterns, prototyping with Codex and Figma Make, Figma MCP with Claude
Design systems: Components built from scratch, design tokens, Figma libraries and variables, Storybook, documentation, governance, contribution process
Product design and research: B2B SaaS, end-to-end feature design, customer interviews, usability testing, interaction and visual design
Collaboration: Designer mentoring, design critique, engineering alignment, distributed teams
Languages: Catalan and Spanish (native), English (fluent, C1)

EDUCATION

Higher National Diploma in Computing Design and Multimedia

ESI (Escuela de Sistemas Informáticos)

2002
