SUMMARY

Senior Product Designer with 15 years of experience across digital products, e-commerce and complex B2B software.

Experience spans shopping and checkout design and optimization, frontend delivery, customer research, usability improvements and production design systems.

EXPERIENCE

Senior Product Designer

Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

- Owned product design as Remuner's sole designer, covering data integrations and configuration, compensation plans and payouts, rep and manager experiences, approvals, roles and permissions, and administration.
- Investigated dashboard feedback through interviews, identifying confusion around plan calculations and payout timing. Designed and shipped changes that user testing showed clarified the missing information.
- Built and maintained the component library and token system with Engineering, supporting consistent implementation across the platform.
- Designed and shipped a conversational AI agent for commissions and sales plans, owning UX/UI, conversation design and trust patterns.
- Built interactive prototypes through AI-assisted workflows for user testing before implementation.

Senior Product Designer

Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

- Designed data-integration and financial-modeling workflows, first in Integrations and later Engine. Scope included integrations, datasets, dimensions, mappings, models and the modeling language.
- Led Dataset Manager design and customer testing, replacing JSON configuration with guided workflows for finance teams. The implementation team estimated standard configuration took roughly half the previous time.
- Identified a context switch during dataset configuration and proposed in-context dimension creation. The change shipped; customers reported faster configuration, fewer errors and less confusion.
- Synthesised customer-call evidence and competitor research to design a consistent formula language with Engineering.
- Co-led the Abax design-system business case with the Head of Design and worked on tokens, components, governance and the engineering pipeline across five squads.

Senior Product Designer & Co-founder

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, hybrid

- Co-founded and led a UX studio for 11 years, delivering work for media, retail, finance, legal and culture clients. Work covered research, information architecture, interaction design, prototyping, frontend delivery and content-management interfaces.
- Owned the full design process and frontend implementation for Kymco's custom e-commerce experiences for e-bikes and motorbikes. Shopping and checkout flows launched and handled real orders.
- Worked across product browsing and multi-step checkout, including dealer selection, customer and billing details, and payment interfaces. Designed and implemented modular content blocks so managers could add, remove and edit bike-page content.
- Owned frontend implementation and platform configuration for FUNK3D's Shopify theme and Somia's WooCommerce store, including WordPress setup, ACF custom fields and frontend integration for Somia.

SKILLS

Product design: E-commerce and checkout flows, complex workflows, information architecture, interaction design, visual design, wireframes and interactive prototypes
Research and validation: Customer interviews, usability testing, customer-feedback synthesis, competitor research, problem prioritisation
Design systems: Component libraries, design tokens, documentation, governance, engineering implementation and review
Tools and implementation: Figma, FigJam, HTML, CSS, JavaScript, Shopify themes, WordPress, WooCommerce, ACF, GitHub, AI-assisted prototyping

EDUCATION

Higher National Diploma in Computing Design and Multimedia

ESI (Escuela de Sistemas Informáticos)

2002
