

Manel Leiva

Senior Product Designer

SUMMARY

Senior Product Designer specialising in integrations, data workflows, and complex configuration interfaces. At Abacum I was the first designer on the integrations squad, turning a JSON-based back-office tool into a self-serve interface that finance teams could use without engineering support. At Remuner I owned product design across multi-step approval workflows, role-based permissions, and data mapping flows as the sole designer. I also built the design system at both companies, so I contribute to shared patterns as naturally as I consume them.

EXPERIENCE

Senior Product Designer

Remuner

May 2024 - Mar 2026 · Barcelona, hybrid

Owned product design across the full platform as the sole designer. Designed multi-step approval workflows, role-based permission systems, and data mapping flows for complex sales incentive logic. Each flow had to work for different user roles with different levels of technical confidence, from finance executives to sales ops.

Built the design system in parallel with shipping product. Component library, token architecture, and an icons repository engineers could pull without involving design.

Senior Product Designer

Abacum

Jan 2022 - Apr 2024 · Barcelona, hybrid

First designer on the integrations and datasets squad. Took the dataset manager from a back-office JSON editor used only by the implementation team to a self-serve interface where enterprise finance teams could connect data sources, define transformations, and configure column types on their own. Research moved from the implementation team outward to end users as the interface matured.

Designed the modeling layer syntax: a formula expression interface for FP&A model creation. Expert users, financial consequences, no room for ambiguity. Standardised formula syntax across the modeling layer and unlocked the follow-on editor suggestions project.

Contributed to design system standardisation across squads: token architecture, component library structure, and the governance that kept Figma aligned with production through multiple releases.

Barcelona

Skills

Design: Figma, component architecture, token architecture, documentation, design critique

Design Systems: Token Studio, Style Dictionary, Storybook, Chromatic, MUI, npm, ESLint, GitHub

Process: cross-squad governance, DS adoption strategies, engineering handoff, JIRA

Domain: fintech, FP&A, B2B SaaS

Languages

Spanish (native)

Catalan (native)

English (professional)

Senior UX Designer & Co-founder

Kings of Mambo

Sep 2010 - Nov 2021 · Barcelona, hybrid

Co-founded and ran a UX studio for over a decade. Most complex projects: KYMCO Spain's backoffice, vLex Iceberg (a legal document repository), e-commerce builds. Most work meant learning an unfamiliar domain fast and collaborating close enough to engineering to know what I was asking developers to build.

EDUCATION

Higher National Diploma in Computing Design and Multimedia

ESI (Escuela de Sistemas Informáticos)

2002
